

Production Access Questionnaire

Testers Community

The objective of this report is to provide comprehensive answers that our clients can use to fill the production access form. You can use the answers directly or can make changes based on how you improved the app. After 14 days of testing, users will be prompted to fill a form on closed testing to get access to production. This document can be helpful in answering those questions.

App Name: Pokersi: Pixel Poker Vs Ai

App URL:
https://play.google.com/store/apps/details?id=com.bradflaugher.pokersi

Production Access Questionnaire

1) How did you recruit users for your closed test? For example, did you ask friends and family, or use a paid testing provider?

We used a paid testing provider to gather comprehensive and detailed feedback on the app. Additionally, we reached out to some of our target users, poker enthusiasts and gamers, to obtain real-world insights from the intended audience.

---

2) How easy was it to recruit testers for your app?

Answer: Easy
(You can select your own answer).

---

3) Describe the engagement you received from testers during your closed test

Testers actively engaged with the app, providing valuable feedback on UI/UX, game mechanics, and overall enjoyment. Their insights led to significant

enhancements, such as improved layouts and clearer navigation, fostering a more immersive and satisfying gaming experience.

---

4) Provide a summary of the feedback that you received from testers. Include how you collected the feedback.

Testers highlighted the need for improved UI/UX, keyword optimization for ASO, an in-app exit confirmation, and a dynamic walkthrough for new users. Feedback was collected through surveys, direct communication, and usability testing sessions with the participants.

---

5) Who is the intended audience for your app?

PokerSI is designed for poker enthusiasts and casual gamers who enjoy retro-style gaming. It appeals to players seeking a fun, AI-driven poker experience with various game modes, all while enjoying a nostalgic 90s aesthetic without ads or in-app purchases.

---

6) Describe how your app provides value to the users.

PokerSI offers a unique poker experience with AI opponents, multiple game modes, and a nostalgic 90s aesthetic. Players enjoy free, ad-free gameplay

while developing their skills against diverse personalities, ensuring engaging and entertaining sessions without any real-money stakes involved.

---

7) How many installs do you expect your app to have in your first year?

Answer: 10k - 100k
(You can select your own answer).

---

8) What changes did you make to your app based on what you learned during your closed test?

We optimized the UI/UX by improving layouts and color contrast, added an in-app exit confirmation popup to prevent accidental exits, and started developing a dynamic walkthrough for new users, enhancing usability and overall user satisfaction.

---

9) How did you decide that your app is ready for production?

After thorough testing and incorporating critical feedback, we resolved key UI issues and enhanced user experience features. The app is now stable, user-friendly, and provides engaging gameplay, making it well-prepared for a successful launch on Google Play.

---

10) What did you do differently this time?

This time, we focused on optimizing the app for ASO by incorporating relevant keywords and enhancing the UI/UX based on detailed tester feedback. We also prioritized user onboarding, ensuring new players can easily navigate and enjoy the app without frustration.

You can use the above answers or add your personal touch to those answers to make them more natural and meaningful. Don't forget that this form plays the most important role in the entire process of getting production access. If you have any more questions, please feel free to contact us.

Best regards,
Testers Community Team
